

EXECUTIVE HSE PROGRAMME

Hazard Identification, Risk Assessment and Control Measures

PROGRAMME FORMAT

Course duration: Not stated

Course Fee: Not stated

INTRODUCTION

Course overview

Hazard Identification, Risk Assessment and Control Measures is designed to equip professionals with the practical knowledge and skills required to identify workplace hazards, assess associated risks, and implement effective control measures. The course promotes proactive risk management, workplace safety, regulatory compliance, and the prevention of accidents, injuries, and operational disruptions.

THE HSE LEARNING JOURNEY

COURSE OBJECTIVES

Learning objectives

By the end of the programme, participants will be able to:

01

BUILD THE FOUNDATION

- Identify physical, chemical, biological, ergonomic, and operational hazards.
- Conduct systematic workplace hazard identification and risk assessments.
- Evaluate the likelihood and potential impact of workplace risks.

02

APPLY THE DISCIPLINE

- Apply appropriate risk control and mitigation measures.
- Develop effective risk registers and control plans.
- Apply the hierarchy of controls to workplace hazards.

03

SUPPORT BETTER DECISIONS

- Strengthen workplace safety awareness and risk prevention.
- Support compliance with occupational health and safety requirements.

TRAINING METHODOLOGY

Training approach

The training combines facilitator-led presentations, practical workplace scenarios, hazard identification exercises, risk assessment workshops, case studies, group discussions, and practical control-measure activities.

● Facilitator-led presentations

● Practical workplace scenarios

● Hazard identification exercises

● Risk assessment workshops

● Case studies

● Group discussions

● Practical control-measure activities

Participants will apply risk assessment techniques to realistic workplace situations.

TRAINING BENEFITS

Training benefits

BENEFITS 01

- Identify hazards before they result in incidents or losses.
- Conduct structured and effective risk assessments.
- Prioritise workplace risks based on severity and likelihood.
- Select appropriate and practical control measures.

BENEFITS 02

- Reduce workplace accidents, injuries, and operational disruptions.
- Strengthen safety culture and employee awareness.
- Improve workplace compliance and risk management practices.
- Support continuous improvement in occupational safety performance.

PARTICIPANT PROFILE

Who should attend?

Course code: RBC-HIRAC-006

- Health, Safety and Environment (HSE) Professionals
- Safety Officers and Supervisors
- Risk Management Professionals
- Operations and Facility Managers
- Project and Construction Managers

- Human Resources and Administration Professionals
- Engineers and Technical Personnel
- Workplace Supervisors and Team Leaders
- Compliance and Quality Professionals
- Employees responsible for workplace safety and risk control

Prerequisite: Not stated.

COURSE OUTLINE

The HSE learning roadmap

1

COURSE MODULE

Fundamentals of Hazard Identification and Risk Management

2

COURSE MODULE

Types and Sources of Workplace Hazards

3

COURSE MODULE

Hazard Identification Techniques and Workplace Inspections

4

COURSE MODULE

Risk Assessment Principles and Methodologies

COURSE OUTLINE

The HSE learning roadmap

5

COURSE MODULE

Risk Rating, Prioritisation and Risk Registers

6

COURSE MODULE

Hierarchy of Controls and Risk Reduction Strategies

7

COURSE MODULE

Engineering, Administrative and Personal Protective Controls

8

COURSE MODULE

Job Safety Analysis and Task-Based Risk Assessment

COURSE OUTLINE

The HSE learning roadmap

9

COURSE MODULE

Emergency Hazards and Operational Risk Controls

10

COURSE MODULE

Monitoring, Reviewing and Communicating Workplace Risks

11

COURSE MODULE

Incident Prevention, Investigation and Corrective Actions

12

COURSE MODULE

Developing an Effective Hazard and Risk Control Programme

PROGRAMME AT A GLANCE

Hazard Identification, Risk Assessment and Control Measures
