

EXECUTIVE HSE PROGRAMME

Incident Investigation and Root Cause Analysis

PROGRAMME FORMAT

Course duration: Not stated

Course Fee: Not stated

INTRODUCTION

Course overview

Incident Investigation and Root Cause Analysis is designed to equip professionals with the knowledge and practical techniques required to investigate incidents systematically, identify underlying causes, and implement effective corrective and preventive actions. The course focuses on evidence gathering, investigation methodologies, root cause identification, risk evaluation, reporting, and prevention of recurrence.

THE HSE LEARNING JOURNEY

COURSE OBJECTIVES

Learning objectives

By the end of the programme, participants will be able to:

01

BUILD THE FOUNDATION

- Understand the principles and purpose of incident investigation.
- Plan and conduct structured incident investigations.
- Collect, preserve, and analyse relevant evidence.

02

APPLY THE DISCIPLINE

- Identify immediate, underlying, and root causes of incidents.
- Apply recognised root cause analysis techniques.
- Develop effective corrective and preventive actions.

03

SUPPORT BETTER DECISIONS

- Prepare clear and professional incident investigation reports.
- Use investigation findings to strengthen organisational safety and performance.

TRAINING METHODOLOGY

Training approach

The training combines facilitator-led presentations, practical investigation exercises, real-world case studies, evidence analysis, group discussions, root cause analysis workshops, and scenario-based activities.

● Facilitator-led presentations

● Practical investigation exercises

● Real-world case studies

● Evidence analysis

● Group discussions

● Root cause analysis workshops

● Scenario-based activities

Participants will work through realistic incident situations to develop practical investigation and problem-solving skills.

TRAINING BENEFITS

Training benefits

BENEFITS 01

- Conduct objective and systematic incident investigations.
- Identify the real causes of incidents rather than focusing only on symptoms.
- Improve corrective and preventive action planning.
- Reduce recurring incidents and operational losses.

BENEFITS 02

- Strengthen organisational risk management and safety performance.
- Improve the quality and credibility of investigation reports.
- Support informed management decision-making.
- Promote a culture of continuous improvement and incident prevention.

PARTICIPANT PROFILE

Who should attend?

Course code: RBC-IIRCA-004

- Health, Safety and Environment (HSE) Professionals
- Safety Managers and Officers
- Risk Management Professionals
- Operations and Production Managers
- Quality Assurance and Quality Control Professionals

- Maintenance and Engineering Professionals
- Internal Auditors and Compliance Officers
- Supervisors and Team Leaders
- Project Managers and Site Managers
- Professionals responsible for incident reporting and investigation

Prerequisite: Not stated.

COURSE OUTLINE

The HSE learning roadmap

1

COURSE MODULE

Fundamentals and Principles of Incident Investigation

2

COURSE MODULE

Incident Classification, Notification and Investigation Planning

3

COURSE MODULE

Evidence Collection, Preservation and Documentation

4

COURSE MODULE

Interviewing Witnesses and Information Gathering Techniques

COURSE OUTLINE

The HSE learning roadmap

5

COURSE MODULE

Incident Reconstruction and Event Analysis

6

COURSE MODULE

Root Cause Analysis: Principles and Methodologies

7

COURSE MODULE

Five Whys, Fishbone Analysis and Fault Tree Analysis

8

COURSE MODULE

Human, Organisational and System Factors

COURSE OUTLINE

The HSE learning roadmap

9

COURSE MODULE

Corrective and Preventive Action Development

10

COURSE MODULE

Incident Investigation Reporting and Documentation

11

COURSE MODULE

Investigation Findings, Risk Assessment and Management Review

12

COURSE MODULE

Case Studies, Practical Investigation Exercises and Lessons Learned

PROGRAMME AT A GLANCE

Incident Investigation and Root Cause Analysis
