

EXECUTIVE HSE PROGRAMME

Process Safety Management for High-Risk Industries

PROGRAMME FORMAT

Course duration: Not stated

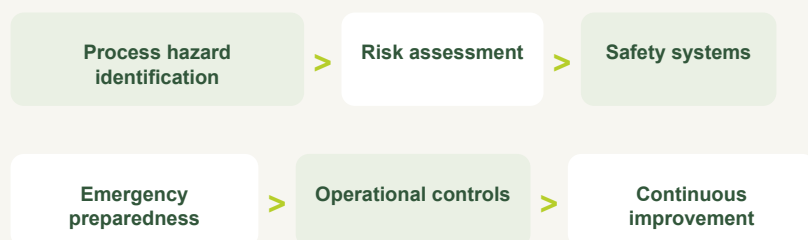

Course Fee: Not stated

INTRODUCTION

Course overview

Process Safety Management for High-Risk Industries provides professionals with the knowledge and practical skills required to prevent major industrial accidents arising from hazardous processes, equipment failures, and uncontrolled releases of dangerous substances. The course focuses on process hazard identification, risk assessment, safety systems, emergency preparedness, operational controls, and continuous improvement of process safety performance.

THE HSE LEARNING JOURNEY

COURSE OBJECTIVES

Learning objectives

By the end of the programme, participants will be able to:

01

BUILD THE FOUNDATION

- Understand the principles and fundamentals of Process Safety Management.
- Identify and assess major process safety hazards and risks.
- Apply effective hazard identification and risk assessment techniques.

02

APPLY THE DISCIPLINE

- Develop and implement robust process safety control measures.
- Strengthen management of change and process safety procedures.
- Improve equipment integrity, maintenance, and operational reliability.

03

SUPPORT BETTER DECISIONS

- Develop effective emergency preparedness and response strategies.
- Promote a strong process safety culture and continuous improvement.

TRAINING METHODOLOGY

Training approach

The training combines expert-led presentations, practical exercises, process safety case studies, hazard identification activities, risk assessment scenarios, group discussions, incident analysis, and emergency response simulations.

● Expert-led presentations

● Practical exercises

● Process safety case studies

● Hazard identification activities

● Risk assessment scenarios

● Group discussions

● Incident analysis

● Emergency response simulations

Participants will apply process safety principles to realistic high-risk industrial environments.

TRAINING BENEFITS

Training benefits

BENEFITS 01

- Identify and control major process safety hazards.
- Reduce the likelihood and severity of industrial incidents.
- Strengthen operational safety and process reliability.
- Improve hazard identification and risk assessment practices.

BENEFITS 02

- Enhance equipment integrity and maintenance controls.
- Strengthen emergency preparedness and incident response.
- Improve compliance with applicable safety standards and organisational requirements.
- Build a proactive process safety culture focused on prevention and continuous improvement.

PARTICIPANT PROFILE

Who should attend?

Course code: RBC-PSM-HRI-002

- Process Safety Professionals
- Health, Safety and Environment (HSE) Managers and Officers
- Plant and Operations Managers
- Engineers and Technical Professionals
- Maintenance and Reliability Managers

- Risk Management Professionals
- Industrial and Production Managers
- Safety Supervisors and Coordinators
- Emergency Response and Incident Management Personnel
- Managers and Professionals working in high-risk industries

Prerequisite: Not stated.

COURSE OUTLINE

The HSE learning roadmap

1

COURSE MODULE

Fundamentals and Principles of Process Safety Management

2

COURSE MODULE

Process Hazard Identification and Risk Assessment

3

COURSE MODULE

Hazard and Operability Studies (HAZOP)

4

COURSE MODULE

Process Safety Risk Analysis and Risk Reduction

COURSE OUTLINE

The HSE learning roadmap

5

COURSE MODULE

Process Safety Information and Operating Procedures

6

COURSE MODULE

Mechanical Integrity and Asset Reliability Management

7

COURSE MODULE

Management of Change and Pre-Startup Safety Review

8

COURSE MODULE

Permit-to-Work and Safe Work Systems

COURSE OUTLINE

The HSE learning roadmap

9

COURSE MODULE

Process Safety Performance Indicators and Monitoring

10

COURSE MODULE

Emergency Preparedness, Incident Response and Investigation

11

COURSE MODULE

Process Safety Culture, Leadership and Human Factors

12

COURSE MODULE

Regulatory Compliance, Auditing and Continuous Improvement

PROGRAMME AT A GLANCE

Process Safety Management for High-Risk Industries

COURSE DURATION

Not stated

COURSE FEE

Not stated

Course Duration: Not stated | Course Fee: Not stated
